HOW TO USE	23

We Exist...

To provide serious solutions to health and wellness issues for people and their loved ones, now.

Our Chief Aim Is...

To make cannabinoid wellness Easy. Clear. Safe.

We Begin...

With our hand-shucked ultra premium flower – excluding stalks, seeds, and stems – grown and tested for our specific cannabinoid profile.

We Extract...

Maximum cannabinoids, terpenes, and other beneficial compounds in the hemp plant using our proprietary cold ethanol process.

We Produce...

Tinctures, topicals, and capsules designed for optimal absorption with a blend of natural and organic ingredients.

We Innovate...

New products through our in-house product development department, always striving to make meaningful impacts on the market.

We Refuse...

To weaken or dilute our products to compete with lower-priced products, believing our obligation to consumers is to provide a therapeutic dose to solve their problems, now.

***How Does CBD Work?***

Cannabidiol (CBD) is one of many naturally occurring phytocannabinoids found in the cannabis plant. CBD has no negative psychoactive effects, is non-toxic, and well-tolerated. CBD functions through its interactions with receptors in the Endocannabinoid System (ECS).

The ECS is essential to health and healing. It exists in all animals with vertebrae. It helps to regulate immune function, sleep, mood/anxiety, motor control, pain, memory, appetite/metabolism, and more.

***Whole Plant Extraction***

Receptra's CBD oil is extracted from our hand-picked hemp flower using cold ethanol extraction. The mixture is evaporated until we have only hemp extract remaining. This process retains the maximum amount of cannabinoids, flavonoids, terpenes, and chlorophyll to provide a true full spectrum hemp extract.

***Ailment Specific Formulations***

Our custom formulations are developed in-house by our chemists using all natural botanicals and terpenes to help solve sleep, stress, and pain concerns. We are first and foremost, a science-driven company.

Colorado Grown

We use 100% organic growing practices on family-owned farms in Colorado. No seeds, no stalks, no stems, and NEVER any pesticides, fungicides, or herbicides. We control our entire seed to bottle process.

All Natural

Receptra's products are formulated with a blend of natural and organic ingredients. We believe the best stuff comes from the Earth. We use no artificial ingredients or preservatives in any of our products.

Third-Party Lab Tests

We take the plant, our product, and the people who use it seriously. Receptra uses third-party labs to test the hemp flower, extract, and end products for purity and potency.

Convenient Dosing

Our tinctures and capsules are formulated to provide accurate dosing so you can achieve the results you are looking for.

Full Spectrum

There are over 400 plant compounds including minerals, terpenes, flavonoids, chlorophyll, fatty acids, and others present in full spectrum hemp extract. Their synergistic interactions contribute to the overall benefits of the product.

Broad Spectrum

Equipped with the strength of our full spectrum products, broad spectrum is a type of hemp extract that has the THC cannabinoid removed while the majority of other phytocannabinoids remain intact.

0% THC

We understand that some of our customers may have concerns about trace amounts of THC in their products due to employment regulations or other concerns, which is why we have specific broad spectrum 0% THC formulations in our product line.

Gluten Free

In an effort to ensure our products are appropriate for a variety of dietary restrictions, all of our products are formulated to be gluten free.

Non-GMO

Genetic modification affects many of the products we consume on a daily basis, but Receptra Naturals is committed to minimal processing and all natural ingredients for ourselves, our families and our consumers.

FDA Certified

Our production facility is audited and certified each year with the FDA's Title 21 CFR 11 regulation, the most rigorous cGMP for dietary supplements.

Getting a good night's sleep is a challenge for many people. Rest at night provides the foundation to seriously take on the day. Receptra™ Rest Full Spectrum Hemp Products are formulated to optimize the time spent recharging by through a good night's sleep.
